PROFESSIONAL SUMMARY

Data/NOC Engineer with 12+ years of ISP experience specializing in network monitoring, troubleshooting, incident response, and IT helpdesk support. Proven track record of high-performance infrastructure management, including deploying **Windows Server 2022** and **Linux Server** environments while maintaining **99.99% operational uptime**. Expert in securing networks using **firewalls**, managing **cloud platforms**, handling **web hosting** infrastructure, and configuring Mikrotik, Cisco, Huawei, and OLT hardware. Combines deep IT operations expertise with hands-on Python/Java programming and systems development experience. Seeking a new opportunity to leverage existing IT skills, further develop software capabilities, and lead cross-functional teams to resolve Tier 2/3 critical outages.

TECHNICAL SKILLS

Programming: Java, Python, PHP, SQL, MySQL, Laravel, HTML, CSS

Data / NOC: NOC Operations, Network Monitoring, Incident Management, Technical Troubleshooting, Fault Isolation

Networking: MikroTik, Cisco, Huawei, VLAN, PPPoE, OSPF, BGP, QoS, Load Balancing, Fiber/Wireless

Monitoring: PRTG, The Dude, SolarWinds, Nagios

Systems: Windows Server 2022, Linux, Virtualization(Proxmox), Firewalls, Microsoft Office 365

Development / AI: Object-Oriented Programming, JDBC, Database Applications, AI Prompting, Image-to-Video Generation, SEO Content Creation.

PROFESSIONAL EXPERIENCE

Data / NOC Engineer | Buenavista Cable TV Inc.

October 26, 2012 – April 11, 2025

- Supported ISP network operations through network monitoring, troubleshooting, incident response, and technical escalation.
- Monitored network health using PRTG, The Dude and generate reports to analyze network performance.
- Support router configuration like MikroTik, Cisco, Huawei, OLT and Manage switches.
- Remote support using tools such as Remote Desktop, Anydesk or other remote-access software.
- Provided **Helpdesk Support** and fault isolation, assisting users with technical issues, troubleshooting, and resolving IT-related concerns.
- Operated and maintained **backup diesel generators** during power outages to ensure continuous facility operations.

Computer & Printer Technician | Glibeltronics Printing Services

June 16, 2011 – September 30, 2012

- Diagnosed and repaired desktop computers and printers, installed operating systems and software, and performed preventive maintenance.
- Install and repairs Point of Sales (**POS**) hardware and software systems for businesses.

INDUSTRY TRAINING / OJT

Industry Training / OJT | STEQ Technological Solutions and Services Inc.

June 26, 2026 – July 21, 2026

- Created AI-assisted content videos as part of industry training activities.
- Gained hands-on experience with image-to-video generation.
- Facilitate entrepreneurial skills for micro-small-medium enterprise (MSMEs).

PROJECTS & ACHIEVEMENTS

Maximized Network Uptime: Maintained a **99.99% network uptime** across enterprise infrastructure by proactively monitoring system health alerts and resolving critical bottlenecks before they caused outages.

Centralized Internet Hotspot: Configured and supported centralized Internet Hotspot deployments for a 6-floor hospital building, collaborating with field technicians during installation, configuration, testing, and troubleshooting.

CCTV Installation: Collaborated with field technicians to install and configure 20+ CCTV systems across resort facilities, including equipment setup, testing, and troubleshooting.

Trouble Ticket System: Developed a system in a previous company to record, track, and manage technical support incidents.

Salary Management System: Worked with a team during Java Programming NC III training to develop a salary management system using Java object-oriented programming and database concepts.

AI Content Production: Created AI-assisted content videos, including image-to-video generation and SEO content creation, during industry training.

Jemzglowa.pl Website Redesign & Development: Assisted in redesigning and developing a WordPress website, enhancing its layout, content presentation, usability, and overall user experience.

CERTIFICATIONS & TRAINING

- Programming (Java) NC III — TESDA, 2026
- Google AI Essentials — 2025
- PHP Masters – CMS Projects — 2019
- MikroTik Certified Network Associate (MTCNA) — 2023
- MikroTik Certified Routing Engineer (MTCRE) — 2023
- MikroTik Certified User Manager Engineer (MTCUME) — 2023

EDUCATION

Bachelor of Science in Computer Engineering | University of Antique

June 2006 – April 2011

ADDITIONAL TECHNICAL EXPERIENCE

- Hands-on experience with CCTV, access control, biometric systems, sensors, and intruder alarm systems.
- Experience reading and interpreting circuit diagrams, wiring, electronic components, and microcontroller-based systems.
